

Dc-1

Single-channel batching module

- ✓ **±1g dispensing accuracy.**
- ✓ **Compact desing with small footprint and flexible layout.**
- ✓ **Modular design, can be easily expanded according to needs**
- ✓ **Assist in manual addition of other raw materials and record data.**
- ✓ **Can be added according to the formula to avoid wrong addition of materials.**

Product Introduction

- Accurate automatic material dispensing ($\pm 1g$) eliminating operational errors.
- Supports task creation based on recipes, work order scanning and more.
- Allows manual addition of custom formulas through the software and collects additional material data.
- Robust and user friendly production management software with real-time statistics and traceability of production batches and material usage data.
- Offers integration with company's ERP/MES system.

Technical Data

Working Environment	EX/Non-EX
Number of Valves	Up to 64
Performance	1-2 min per 20L
System Precision	$\pm 1g$ per 30kg Range
Pump Size	0.5"/1"
Valve Type	Two-stage Multi Flow Valve
