

CG-F50D

Double Nozzles Filling Machine

✓ Easy to operate and use

✓ High equipment stability and low failure rate;

✓ Rolling type capping machine can avoid barrel expansion (less air be pressed in the buckets).

✓ Integrated self-learning algorithms to continuously optimize filling accuracy and efficiency

Product Introduction

- Replace the filling valve port according to different barrel shapes, compatible with different barrel shapes.
- Automatically reset after starting, with emergency stop protection device.
- Flexible movement, easy maintenance and simple operation.
- One worker operates, saving costs.
- With remote technical support function.

Technical Data

Weighing range	0.2kg-5kg, 5kg-10kg, 5kg-30kg (Customizable)
Working environment	EX/Non-EX
Accuracy level	x(0.5)/ $\pm 0.1\%$
Graduation value	1g, 2g, 5g, 10g
Number of filling heads	Double Heads
Rated power	1000W
Power supply	240/415V--50 HZ
Packing container size	0.2L-1L, 1L-5L 10L-20L
