

Dc-X

Single-channel batching
module

- ✓ Miniaturized design, occupying small space
- ✓ Modular design, can be used on a single machine or in combination with multiple units
- ✓ Small investment and convenient deployment
- ✓ High precision and easy addition ($30\text{ kg} \pm 1\text{ g}$)

Product Introduction

- Accurate automatic material dispensing ($\pm 1g$) eliminating operational errors.

Optional:

- Supports task creation based on recipes, work order scanning and more.
- Allows manual addition of custom formulas through the software and collects additional material data.
- Robust and user friendly production management software with real-time statistics and traceability of production batches and material usage data.
- Offers integration with company's ERP/MES system.

Technical Data

Working Environment	EX/Non-EX
Performance	1-2 min per 20L
System Precision	$\pm 1g$ per 30kg Range
Pump Size	0.5"/1"
Valve Type	Two-stage Multi Flow Valve
